

Activity-Based Costing in Digital Twin Studio®

Digital Twin and AI Solutions

Digital Twin Studio® monitors and optimizes costs in real-time while using historical data and AI to forecast and adjust to future disruptions.

Accurate forecasting eliminates production overload based on demand, and optimizes production schedules to eliminate storage cost.

Digital Twin Studio® reduces operational costs across the entire operation on-the-fly.

Patented **smaRTLs®**
simplifies the installation
and configuration of
multiple locator devices
and technologies.

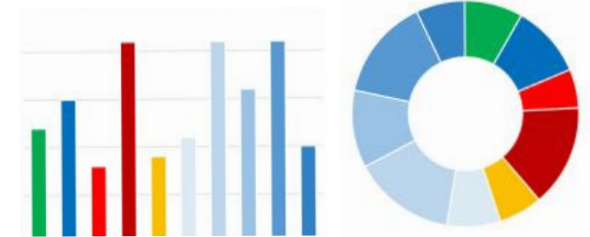

Tie in active/passive RFID,
Barcode, GPS and more.

99.9% Accurate
Real-Time
Reporting

Direct Data Connectivity
WMS/WCS SAP® ERP and more!

**DIGITAL TWIN
STUDIO**

2-4 Week Deployment
ROI in 6-8 Months

Track and maintain cost per SKU
Optimize scheduling to reduce WIP
Identify low-moving SKUs
Optimize slotting and cubing
Optimize pick paths
